

VAIBHAV KARADE

Cloud DevOps Engineer

Dharwad, India 580006 • +91 7349610842 • vaibhavkarade43@gmail.com

AZ-900 • AZ-104 • AZ-400 Certified • 6.7 Years Experience

PROFESSIONAL SUMMARY

Results-driven Cloud DevOps Engineer with 6.7 years of hands-on experience at Capgemini, TCS, and EPAM Systems, specializing in CI/CD automation, Kubernetes orchestration, cloud infrastructure, and data operations on Azure. Microsoft Azure certified (AZ-900, AZ-104, AZ-400) with a strong track record of designing scalable DevOps pipelines, automating cloud workflows, and supporting data platforms including Azure Databricks, Azure Data Factory, and SQL Server. Adept at reducing deployment friction, improving system reliability, and enabling data-driven organizations through infrastructure-as-code and GitOps practices.

CORE COMPETENCIES

• CI/CD Pipelines (Azure DevOps, GitHub Actions, Jenkins, GitLab)	• Kubernetes & Docker Orchestration	• Infrastructure as Code (Terraform, Ansible)	• Azure Cloud (ADF, Databricks, AKS, App Gateway)
• Monitoring & Observability (Prometheus, Grafana, ELK Stack)	• DevSecOps (SonarQube, Trivy, Nexus, Secret Rotation)	• GitOps & Helm Chart Management	• DataOps & Cloud Data Platform Administration

PROFESSIONAL EXPERIENCE

Cloud DevOps Engineer | EPAM Systems | Bengaluru, India (Remote) Nov 2023 – Present

- Designed and optimized CI/CD pipelines for cloud-native applications using Azure DevOps, GitHub Actions, Jenkins, and GitLab, enabling automated, zero-touch deployments across dev, staging, and production environments.
- Containerized applications using Docker and Kubernetes (AKS), ensuring environment parity across the full SDLC and reducing environment-related defects.
- Managed and supported Azure Data Factory and Azure Logic Apps workflows for data integration and processing pipelines in a production DataOps environment.
- Built real-time observability stack with Prometheus, Grafana, and ELK Stack for application monitoring, log aggregation, and proactive incident detection.
- Ensured compliance and governance across Azure Databricks, Azure Data Factory, and SQL Server; enforced RBAC and access controls for data platform security.
- Integrated SonarQube for continuous code quality analysis and automated security scanning with Trivy and Nexus artifact management.
- Automated operational workflows including: removal of disabled users from Azure AD security groups, Azure DevOps work item state transitions to improve lead/cycle time, PAT token rotation for Azure Databricks, and Service Principal secret rotation in Azure.
- Configured backup, CI/CD setup, and alerting pipelines for Azure Analysis Services, ensuring high availability of the BI platform.

DevOps Engineer | Tata Consultancy Services (TCS) | Pune, India (Remote) Aug 2022 – Nov 2023

- Built and maintained robust CI/CD pipelines using Azure DevOps, GitHub, and Jenkins for continuous delivery of microservices-based applications.
- Automated infrastructure provisioning and configuration management with Terraform and Ansible, achieving consistent, repeatable deployments at scale.
- Implemented container orchestration using Docker Swarm, Kubernetes, and Rancher, improving microservices deployment velocity and resource utilization.
- Deployed and maintained Prometheus and Grafana monitoring stack with custom alerting rules, ensuring SLA compliance and proactive issue resolution.

Software Engineer – DevOps | Capgemini Technology Services | Bengaluru, India (Remote) Aug 2019 – Jul 2022

- Transitioned from Hyper-V environments to Azure Cloud, gaining depth across Azure networking, security, compute, and DevOps toolchain.
- Managed Azure DevOps project-level RBAC, access controls, and user permission models for enterprise teams.
- Provisioned and managed large-scale cloud infrastructure using Terraform across services including Web Apps, Deployment Slots, Azure Load Balancer, Application Gateway, Azure Firewall, Azure Policy, Azure Monitor, Azure Backup, and Azure Update Management.
- Worked directly with clients to enhance automated testing frameworks within CI/CD environments using Azure tools, contributing to a 3x reduction in production code defects.
- Leveraged Azure CLI and Azure PowerShell for day-to-day resource management and automation scripting.

TECHNICAL SKILLS

Cloud Platforms	Microsoft Azure (AKS, ADF, Databricks, App Gateway, Firewall, Monitor, Backup), AWS
CI/CD & DevOps	Azure DevOps, GitHub Actions, GitLab CI, Jenkins, GitOps
Containers & Orchestration	Docker, Kubernetes (AKS), Helm, Rancher, Docker Swarm, Kyverno, Velero
IaC & Config Mgmt	Terraform, Ansible
Monitoring & Logging	Prometheus, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana)
Security & DevSecOps	SonarQube, Trivy, Nexus, Secret Rotation, Service Principal, RBAC, Azure Policy
DataOps	Azure Databricks, Azure Data Factory, Azure Logic Apps, SQL Server, Azure Analysis Services
Scripting	Bash, PowerShell, Azure CLI
Cost & Resource Mgmt	Cost AI, Karpenter

CERTIFICATIONS

AZ-900 — Azure Fundamentals Microsoft	AZ-104 — Azure Administrator Microsoft	AZ-400 — Azure DevOps Engineer Microsoft
---	--	--

EDUCATION

Bachelor of Engineering — Electronics and Communication Engineering
KLS Vishwanathrao Deshpande Institute of Technology (KLS Vdit)

Graduated 2018
