Summary

A highly skilled and results-driven DevOps professional with over 5.5 years of experience working across leading companies like Capgemini, TCS, and EPAM Systems. I specialize in cloud platforms, CI/CD automation, and data operations. Proven expertise in leveraging tools like Jenkins, Docker, Kubernetes, Terraform, and Azure DevOps to streamline workflows and enhance system performance. Certified in Microsoft Azure (AZ-900, AZ-104, AZ-400) with strong problem-solving skills and a passion for optimizing cloud infrastructures.

Experience

Cloud DevOps Engineer, EPAM Systems - Bengaluru, India (Remote)

11/2023 to Current

- Developed and optimized CI/CD pipelines for cloud-native applications using Azure DevOps, GitHub Actions, Jenkins, and GitLab to enable automated deployments across environments.
- Implemented Docker and Kubernetes to containerize applications, ensuring consistent environments across development, testing, and production.
- Supported data integration and processing workflows with Azure Data Factory and Azure Logic Apps.
- Integrated Prometheus, Grafana, and ELK for real-time application monitoring, logging, and troubleshooting.
- Ensured secure and compliant cloud infrastructure, handling services like Azure Data Factory, Azure Databricks, and SQL Server for data operations.
- Integrated SonarQube for code quality checks, automating security scanning with Trivy and Nexus.
- Implemented automations like removing disabled users from security groups, work items state transition to improve lead and cycle time in Azure DevOps, PAT token rotation of Azure Databricks, secret rotation of Service Principal in Microsoft Azure.
- Managed backup configuration, CI/CD setup, and alerts setup for Azure Analysis Services.

DevOps Engineer, Tata Consultancy Services - Pune, India (Remote)

08/2022 to 11/2023

- Built and maintained CI/CD pipelines for seamless delivery using Azure DevOps, GitHub, and Jenkins.
- Automated infrastructure deployment and configuration using Terraform and Ansible.
- Implemented container orchestration with Docker Swarm, Kubernetes, and Rancher, enhancing microservices deployment and scaling.
- Managed infrastructure and configurations using Terraform and Ansible for scalable and maintainable solutions.
- Deployed and maintained Prometheus and Grafana for monitoring, alerting, and visualizing metrics to ensure high availability and performance.

Software Engineer, Capgemini Technology Services - Bengaluru, India (Remote)

08/2019 to 07/2022

- Worked on Hyper-V environment for a few months and transitioned to Azure Cloud, learning DevOps tools like IAC, configuration management, and Azure DevOps.
- Managed permissions of Azure DevOps projects for users.
- Supported cloud infrastructure provisioning using Terraform for large-scale applications.
- Gained experience with Web apps, deployment slots, Azure Load Balancer, Application Gateway, Azure Firewall, identity and access management, Azure Policy, Azure Monitor, Azure Backup, and Azure Update Management.
- Collaborated with development teams to implement and maintain automated testing and deployment strategies.

- Worked with clients to enhance automated testing frameworks within CI/CD environments using Azure tools, reducing code errors by a factor of three.
- Utilized Azure CLI and Azure PowerShell to manage Azure resources.

Education

Bachelor of Engineering, KLS VDJT

- Studied Electronics and Communication Engineering.
- Gained foundational knowledge in electronics, communication, and engineering principles.

Certifications

AZ-900 (Azure Fundamentals)

- Certified in fundamental Azure cloud concepts.

AZ-104 (Azure Administrator)

- Certified in managing Azure resources and services.

AZ-400 (Azure DevOps Engineer)

- Certified in designing and implementing DevOps practices on Azure.
